QUESTION 1

Which ports on a firewall need to be opened to allow client PCoIP traffic to flow from user\'s endpoints to a Unified Access Gateway appliance?

A. TCP 4172 and UDP 4172

B. TCP 443 and TCP 4172

C. TCP 443 and UDP 4172

D. TCP 4172 and UDP 443

Correct Answer: B

Reference: https://docs.vmware.com/en/Unified-Access-Gateway/3.1/com.vmware.uag-31-deploy-config.doc/GUID-F197EB60-3A0C-41DF-8E3E-C99CCBA6A06E.html

QUESTION 2

A customer is looking to implement a VMware solution with these requirements:

1.

 Support for 200 call center employees on a single 8-hour shift

2.

 Application access through physical Windows 7 desktops

3.

 Restrict access to only these applications: Google Chrome, FileZilla (an open source FTP application), and a custom in-house client-server call center application

An architect is tasked with determining the lowest cost license solution that will meet the customer\'s requirements.

Which solution should the architect choose?

A. 600 concurrent licenses of Horizon 7

B. 200 named licenses of Horizon 7

C. 200 concurrent licenses of Horizon 7

D. 600 named licenses of Horizon 7

Correct Answer: C

QUESTION 3

![Pass2Lead](https://Pass2Lead.com)
A company has decided to virtualize all of its helpdesk employee\\'s workstations. These requirements must be met:

1.

 All applications used by the employees will be published through RDS hosted application.

2.

 Users will NOT be allowed to store any personal data on their Horizon desktops.

3.

 The Horizon desktop design should meet maximum storage space efficiency.

4.

 The Horizon desktop design should meet maximum performance.

5.

 The Horizon desktop design should meet maximum power savings.

Which three features can be enabled to meet the company\\'s requirements? (Choose three.)

A. Full clones

B. Instant clones

C. Space Efficient disk format (SEsparse)

D. Content-based read cache (CBRC)

E. Virtual SAN (vSAN)

Correct Answer: BCD

QUESTION 4

A company wants to allow sales personnel to use laptops to access the internal VDI. Due to security constraints, VDI desktop pools for travelers will not be granted access to the Internet. Sales personnel however will be able to access links from email or other documents from their VDI sessions.

What can be implemented to meet these requirements?

A. Install View Agent with URL redirection enabled.

B. Install View Client with URL redirection enabled.

C. Enable clipboard sharing.

D. Enable Client Drive redirection.

Correct Answer: D

![Pass2Lead](https://Pass2Lead.com)
QUESTION 5

The architect of a company is asked to design a single VMware View Pod/Block without a single point of failure component. Which component offers the lowest availability?

A. Horizon View Connection Server

B. Horizon View Composer

C. vCenter Server

D. Horizon View Security Server

Correct Answer: C

QUESTION 6

The finance group in a company has asked for a new application to be made available to all of the members of the finance department. The application is currently installed on all the finance desktops, but will be moving to a cloud-hosted model.

What solution should the IT administrator use to manage access to the new application?

A. Package the application using ThinApp and deploy to the finance department.

B. Manage the application with VMware Identity Manager.

C. Assign the new application to the finance department using App Volumes.

D. Deploy each user a new cloud based virtual desktop.

Correct Answer: B

QUESTION 7

A customer wants to deploy VMware Horizon View to support virtual desktops hosted in two different physical locations and wants users to connect to the location nearest them to start a session. Which three steps must be completed to enable this functionality? (Choose three.)

A. Initialize Microsoft DFS.

B. Configure Global Entitlements.

C. Configure two View Pods.

D. Configure one View Pod spanning two sites.

E. Configure two event logging databases.

F. Initialize the Cloud-Pod Federation.

Correct Answer: CEF

![Pass2Lead](https://Pass2Lead.com)
QUESTION 8

When determining the number, type, and size of Horizon View components to be installed, which three pieces of information must an architect know? (Choose three.)

A. Number of concurrent users who will connect to the environment.

B. Type of client that will be used by the users.

C. Version of Windows that will be used for the virtual desktops

D. Type of desktop pools that will be provisioned.

E. Maintenance windows and availability requirements for the environment.

Correct Answer: BCD

---

QUESTION 9

In a local design, a company selected one database instance to be shared by Horizon View Composer database, vCenter external database, and Horizon AppVolumes database. The design must provide High Availability for all databases. Which two database server options should be selected during physical design creation? (Choose two.)

A. Oracle 10g

B. Microsoft SQL Server 2014

C. Oracle 11g

D. Microsoft SQL Server 2012

Correct Answer: BC

QUESTION 10

An architect for Company A is working on implementing a VMware Horizon solution.

1. Company A will be acquiring Company B in the coming months.

2. Company B has an existing Active Directory structure and there are NO plans to move those users over to Company A\\'s Active Directory structure

3. However, users from Company B need to be able to use VDI desktops running in Company A. Which step could the architect take to meet requirements?

A. Use vdmadmin

Correct Answer: C

QUESTION 11

A customer has made the decision to implement App Volumes. The customer has two data centers for High Availability. VMware recommends two different deployment modes for App Volumes in a multi-site implementation.

Which two requirements are common to all of the models? (Choose two.)

A. Deploy a Microsoft SQL Cluster.

B. Deploy a minimum of one App Volumes manager in each site.

C. Ensure AppStack replication is configured.

D. Reproduce Entitlements in both locations.

Correct Answer: CD

QUESTION 12

A customer is struggling with how to support application delivery to its highly mobile sales force. There are two Windows applications that need to be delivered, which could present a challenge. Both applications use a local copy of the central database and the applications are frequently being updated.

During assessments and user interviews, the sales personnel indicated that they frequently use these two applications while traveling in areas with poor connectivity. The sales people rarely connect to the company network. Pushing out updates using a traditional deployment system is therefore difficult.

Which solution from VMware would solve the customer\\'s situation?

A. Package the applications as an App Volumes Appstack. Manage delivery and updates off the Appstack using VMware Identity Manager.

B. Package the applications using ThinApp and manage delivery and updates using VMware Identity Manager.

C. Install the applications on RDS Hosts and publish them using Horizon 7. Since installed centrally, management of the applications will now be possible using traditional methods.

D. Package the application using ThinApp for isolation and publish them to users using Horizon 7. Place the ThinApp packages on a network share for central and easy updates.

Correct Answer: D

QUESTION 13

A company is implementing VMware Horizon View 7 solution. It has created four 500 linked-clone desktop pools to be used by different departments and workers. The company\\'s VDI administrator noticed that Horizon View Composer is showing in error state on the View Admin Web Console. During restart of the Composer service, the service failed to start up again. A decision was made to migrate View Composer to a new server and preserve the linked-clone information.

What three steps are requires for the migration? (Choose three.)

![Pass2Lead](https://Pass2Lead.com)
A. Install View Connection Server on the new machine.

B. Create a new SQL database

C. Migrate the RSA key constrainer.

D. Configure Horizon View Composer to point to the existing SQL database.

E. Install the VMware Horizon View Composer service.

Correct Answer: CDE

QUESTION 14

A customer is planning on implementing Horizon View. Security is a major concern. Only corporate managed Windows laptops should be able to access the Horizon environment from the Internet. Which solution should be implemented to support the requirement?

A. Deploy NSX. Use NSX feature to validate client\\'s MAC addresses and only allow registered clients.

B. Deploy VMware Identity Manager. Configure it to require RSA SecureID. Only install the RSA SecureID soft token software on managed devices. Configure Horizon to allow SAML.

C. Deploy View Security Server. Configure it to only allow domain joined computers accessing Horizon.

D. Deploy Unified Access Gateway. Configure it to require a device client certificate and to use pass-through authentication for Horizon. Distribute certificates to managed devices.

Correct Answer: D

QUESTION 15

Company A decided to start using GPO to optimize PCoIP across all their Horizon 7 Desktop pools. During the Proof of Concept (POC) on the local network, there were no performance issues. The company decided to move to UAT. Access from the outside network needs to be tested. Some sales staff traveling to overseas countries, where network speed is low, have reported that the screen quality is degraded during usage.

Which setting should be recommended to retain screen quality, regardless of a user\\'s connection?

A. Configure the PCoIP session bandwidth floor value.

B. Configure PCoIP client image cache size policy.

C. Turn on Build-to-Lossless feature.

D. Configure the maximum PCoIP bandwidth session.

Correct Answer: C
