QUESTION 1

What is the RAID level on an Avamar NDMP accelerator node?

- A. 0
- B. 1
- C. 5
- D. 6

Correct Answer: B

QUESTION 2

In an EMC Data Protection Advisor environment, what is monitored by Predictive Analysis Engine rules?

- A. Missed service levels
- B. Apple MAC clients
- C. HomeBase server uptime
- D. Tape drive shoeshining statistics

Correct Answer: C

QUESTION 3

A customer wants to use EMC Avamar to back up their VMware environment. They have a requirement for file-level restores of their Linux virtual machines. Which backup approach should they use?

- A. Guest
- B. ESX console
- C. VMware Consolidated Backup
- D. VMware image backup with VADP

Correct Answer: A

QUESTION 4

A system administrator wants to manage their EMC Data Domain system through the Enterprise Manager. However, the web browser is currently not working. What is an alternative method to manage the Data Domain system?

- A. Use the Command Line Interface over SSH

- B. Connect using the local Java-based FAT client
- C. Use RDP to connect to the Data Domain
- D. Connect through Terminal Services

Correct Answer: A

QUESTION 5

A customer has purchased Data Protection Advisor and would like to collect system performance information from 100 HP_UX servers. How many Collectors are required in an environment with four data centers?

- A. 1
- B. 4
- C. 25
- D. 100

Correct Answer: D

QUESTION 6

An EMC NetWorker customer is implementing an EMC Disk Library with the Embedded Storage Node feature on both engines. Active Engine Failover is also configured. In case of a failover, which component from the failed engine will be missing on the surviving engine?

- A. Remote Copy Policy configuration
- B. Fibre Channel WWNs
- C. Embedded Storage Node
- D. SAN client configuration

Correct Answer: B

QUESTION 7

A company located in Amsterdam has recently acquired a company in Rome. Since both locations have their own file servers containing sensitive data, they want to backup everything to their central backup repository in Amsterdam.

The customer only has a 2 Mb/s connection between both locations. What is the best EMC product to back up everything to the Amsterdam office?

- A. Avamar
- B. NetWorker

C. Data Domain

D. HomeBase

Correct Answer: A

QUESTION 8

An Avamar customer has just deployed a VMware environment. The customer wants to ensure they receive the highest level of deduplication within the environment. Which type of backup should be performed?

A. Guest

B. VCB proxy host

C. VADP

D. ESX console

Correct Answer: B

QUESTION 9

A new backup and recovery solution needs to be designed for a customer with the following characteristics:

Large NAS servers in the data center Three-month retention period

In addition, the customer has a number of small remote offices that need to be protected with minimal operational cost. Which product is most suitable to address this environment?

A. Avamar

B. HomeBase

C. Data Domain

D. NetWorker with a deduplication node

Correct Answer: A

QUESTION 10

On an Avamar server using default settings, what is the maximum allowable operating system capacity utilization after which HFS check will not run?

A. 65%

B. 85%

C. 90%

D. 95%

Correct Answer: C

Avamar Server Capacity Thresholds (2 of 2)

Garbage collection does not run when OS capacity exceeds 85%
– As checkpoints roll off, garbage collection will resume

`hfscheck` will not run when OS capacity exceeds 90%

Checkpoint does not run when OS capacity exceeds 96%

QUESTION 11

A customer has a critical 700 GB application that is CPU- and disk-intensive. The backup window for this application is one hour. Which backup method would you recommend for this application?

- A. LAN-free backup
- B. Serverless backup
- C. LAN-based backup
- D. Direct-attached backup

Correct Answer: D

QUESTION 12

When replicating backup data, what is an advantage of EMC Data Domain inline deduplication compared to products that use post-process deduplication?

- A. Fastest time to disaster recovery readiness
- B. Lowest LAN bandwidth consumption during replication
- C. Data is backed up before it is replicated
- D. Data integrity is guaranteed

Correct Answer: A

QUESTION 13

An EMC NetWorker customer wants to automate their production server configuration following a disaster, including recovery and migration. Which EMC product should NetWorker integrate to achieve this requirement?

- A. HomeBase
- B. Avamar
- C. Data Protection Advisor
- D. Data Domain

Correct Answer: A

QUESTION 14

Which feature can be used without requiring an additional license on an EMC Data Domain system?

- A. Snapshots
- B. Replication
- C. Encryption
- D. DD Boost

Correct Answer: A

QUESTION 15

To consolidate backup servers, which component plays an important role in EMC NetWorker backup planning?

- A. Proxy server
- B. Storage node
- C. Management host

D. Virtual tape library

Correct Answer: B
