**QUESTION 1**

An XML schema can be used to define XML documents that can be shared by components, SOAP- based Web services, and REST services. Select the correct answer.

A. True

B. False

Correct Answer: A

QUESTION 2

Identify what is wrong with this statement: "If I have 4 SOAP-based Web services, I must have 4 WSDL definitions and 4 XML schemas." Select the correct answer.

A. SOAP-based Web services don't use XML schemas for their WSDL definitions.

B. WSDL definitions can share the same XML schema and can also link to multiple XML schemas, so stating that 4 SOAP-based Web services must have 4 XML schemas is incorrect.

C. Each WSDL definition must have at least 2 XML schemas, so the correct amount of required XML schemas in this case is 8.

D. There is nothing wrong with this statement.

Correct Answer: B

QUESTION 3

Services hosted within an enterprise service bus cannot support asynchronous message exchanges due to the limitations of message routing features built into enterprise service bus implementations. Select the correct answer.

A. True

B. False

Correct Answer: B

QUESTION 4

Which of the following are valid HTTP methods? SELECT ALL THAT APPLY

A. Get

B. Upload

C. Put

D. Delete

Correct Answer: ACD

QUESTION 5

A SOAP-based Web service is required to transmit an XML-based invoice document to a REST service. However, the SOAP-based Web service is designed to represent invoice data using an XML schema that is different from the XML schema used within the REST service. How can the disparity between the XML schemas, used by these two services, be overcome so that they can exchange the invoice document? Select the correct answer.

- A. A layer of data format transformation logic needs to be introduced based on mashup technologies, such as DTD and WS-Transform.
- B. A layer of protocol transformation logic needs to be introduced based on Web technologies, such as HTTP and FTP.
- C. A layer of data model transformation logic needs to be introduced, based on XML technologies, such as XSLT.
- D. There is no technique or technology for overcoming differences between XML schemas.

Correct Answer: C

QUESTION 6

Which of the following statements makes sense? Select the correct answer.

- A. I designed a unique XML schema for each of my REST services so that the HTTP methods used by these services are consistently named.
- B. My REST services are limited to the use of the GET HTTP method because only one XML schema was designed for all of them. In order to support additional HTTP methods, additional XML schemas will need to be designed due to the inherent dependency HTTP has on the XML Schema Definition Language.
- C. I designed my REST services to share the same XML schema.
- D. XML schemas cannot be used by REST services.

Correct Answer: C

QUESTION 7

The amount of services participating in a service activity, the duration of the service activity, the amount of service activity instances that concurrently exist, and rules associated with the service activity are all examples of: Select the correct answer.

- A. design-time data that is defined via the WSDL data definition language
- B. runtime data that is expressed as part of a WSDL service operation definition
- C. state or context data that can be managed using WS-Coordination

D. repository resource data that can be managed using WS-Policy via persistence in a database for long- term storage

Correct Answer: C

QUESTION 8

WS-BPEL is a technology that can be used to express service composition logic for SOAP-based Web services. Select the correct answer.

A. True

B. False

Correct Answer: A

QUESTION 9

XML is a form of: Select the correct answer.

A. microdata

B. metadata

C. valid data

D. relational data

Correct Answer: B

QUESTION 10

An intermediary can be an initial sender or an ultimate receiver. Select the correct answer.

A. True

B. False

Correct Answer: B

QUESTION 11

Which of the following technologies has a namespace pre-defined by an industry standards organization? Select the correct answer.

A. WS-Addressing

B. REST

C. Web 2.0

D. Because all Web-based technologies are required to have namespaces, all of the above technologies have pre-defined namespaces.

Correct Answer: A

QUESTION 12

Which of the following statements is true? Select the correct answer.

- A. A service enters the service provider role when it initiates contact with other services, including those that act as intermediaries.
- B. A service enters the service provider role when it initiates contact with intermediaries only.
- C. A service enters the service provider role when it is accessed by other service consumers, including intermediaries.
- D. A service enters the service provider role when it is accessed by intermediaries only.

Correct Answer: C
