## QUESTION 1

A SOAP message is an XML document that is comprised of a set of pre-defined parts. Which of the following are parts that can be found in a SOAP message? SELECT ALL THAT APPLY

- A. Envelope
- B. Body
- C. Header
- D. Footer

Correct Answer: ABC

---

## QUESTION 2

Which of the following statements does not make sense? Select the correct answer.

- A. I built 3 SOAP-based Web services, each of which has its own published WSDL definition. 2 of the WSDL definitions share the same XML schema.
- B. I built 3 XML schemas, two of which are being shared by the same WSDL definition.
- C. I built 3 WSDL definitions and 3 XML schemas. Each WSDL definition is associated with its own XML schema.
- D. All of the above statements make sense.

Correct Answer: D

---

## QUESTION 3

A SOAP-based Web service is essentially: Select the correct answer.

- A. solution logic that can only be accessed via HTTP methods
- B. solution logic accessible via binary RPC protocols
- C. solution logic that has been shaped by service-orientation design principles
- D. solution logic that can be accessed via a published WSDL definition

Correct Answer: D

---

## QUESTION 4

Which of the following are valid HTTP methods? SELECT ALL THAT APPLY

- A. Get

B. Upload

C. Put

D. Delete

Correct Answer: ACD

---

## QUESTION 5

Which of the following statements is true? Select the correct answer.

- A. WS-ReliableMessaging standardizes reliability levels associated with databases required to persist state data.
- B. WS-ReliableMessaging standardizes the issuance and delivery of positive and negative acknowledgement messages.
- C. WS-ReliableMessaging standardizes SOAP headers related to atomic transactions with rollback features.
- D. WS-ReliableMessaging standardizes the expression of service composition logic, but only for SOAP-based Web services.

Correct Answer: B

---

## QUESTION 6

An XML schema can be used to define XML documents that can be shared by components, SOAP- based Web services, and REST services. Select the correct answer.

A. True

B. False

Correct Answer: A

---

## QUESTION 7

The acronym SOAP was originally defined as: Select the correct answer.

- A. Simple Object Access Protocol
- B. Service-Oriented Access Protocol
- C. Service Object Access Parameters
- D. Simple Object Acknowledgment Protocol

Correct Answer: A

---

## QUESTION 8

Which of the following statements makes sense? Select the correct answer.

- A. I have 3 REST services, 2 of which do not support the PUT method.
- B. I have 3 REST services, 2 of which have a PUT operation in the SOAP header schemas of their WSDL definitions.
- C. I have 3 REST services, 2 of which do not support HTTP.
- D. None of these statements make sense.

Correct Answer: A

---

## QUESTION 9

SOAP-based Web services can be designed for use within traditional RPC-style distributed solutions or for use in service-oriented solutions. Select the correct answer.

- A. True
- B. False

Correct Answer: A

---

## QUESTION 10

WS-Addressing is most commonly associated with \_\_\_\_\_ functionality. Select the correct answer.

- A. process management
- B. policy enforcement
- C. message routing
- D. choreography

Correct Answer: C

---

## QUESTION 11

A common, but older alternative to the XML Schema Definition Language is: Select the correct answer.

- A. Hypertext Markup Language
- B. Extensible Markup Language
- C. Document Type Definitions
- D. XML Data Model Definition Language

Correct Answer: C

---

## QUESTION 12

Which of the following statements are true? SELECT ALL THAT APPLY

- A. A service can exist as a component.
- B. A service can exist as a SOAP-based Web service.
- C. A service can encapsulate one or more components.
- D. A service can encapsulate one or more SOAP-based Web services.

Correct Answer: ABC

---

## QUESTION 13

Using WS-AtomicTransaction you wrap 3 SOAP-based Web services in a single transaction. When it is time to vote on the outcome of the transaction, 2 of the services vote to commit the changes made during the transaction, but a vote from the third service is not received. What will happen? Select the correct answer.

- A. The changes are committed because the transaction is considered successful as long as no Abort votes are received.
- B. The changes are rolled back because the transaction is considered unsuccessful when there is a missing vote.
- C. The changes are committed because the transaction is considered successful as long as one Commit vote is received.
- D. The changes are aborted because a transaction can only be considered successful when more than 2 Commit votes are received.

Correct Answer: B

---

## QUESTION 14

To create REST services, you are required to deploy an enterprise service bus due to the need for inherent message routing functionality. Select the correct answer.

- A. True

- B. False

Correct Answer: B

---

## QUESTION 15

Which of the following are associated with the functionality provided by a typical enterprise service bus? Select the

correct answer.

- A. reliable message delivery
- B. intermediate message routing
- C. temporary storage of messages in queues
- D. All of the above.

Correct Answer: D
