QUESTION 6

Which role can add a binding to a policy set in IBM App Connect Enterprise?

- A. Policyowner
- B. Developer
- C. Administrator

D. Policy Holder

Correct Answer: C

QUESTION 7

What are two mechanisms for storing user permissions to enable administration security on the Web Console?

- A. OAuth
- B. LDAP
- C. File
- D. Queue
- E. YAML

Correct Answer: BE

QUESTION 8

Which IBM App Connect Enterprise component interacts with version control systems?

- A. Integration Server
- B. IBM App Connect Enterprise Web User Interface
- C. IBM App Connect Enterprise toolkit
- D. Integration Node

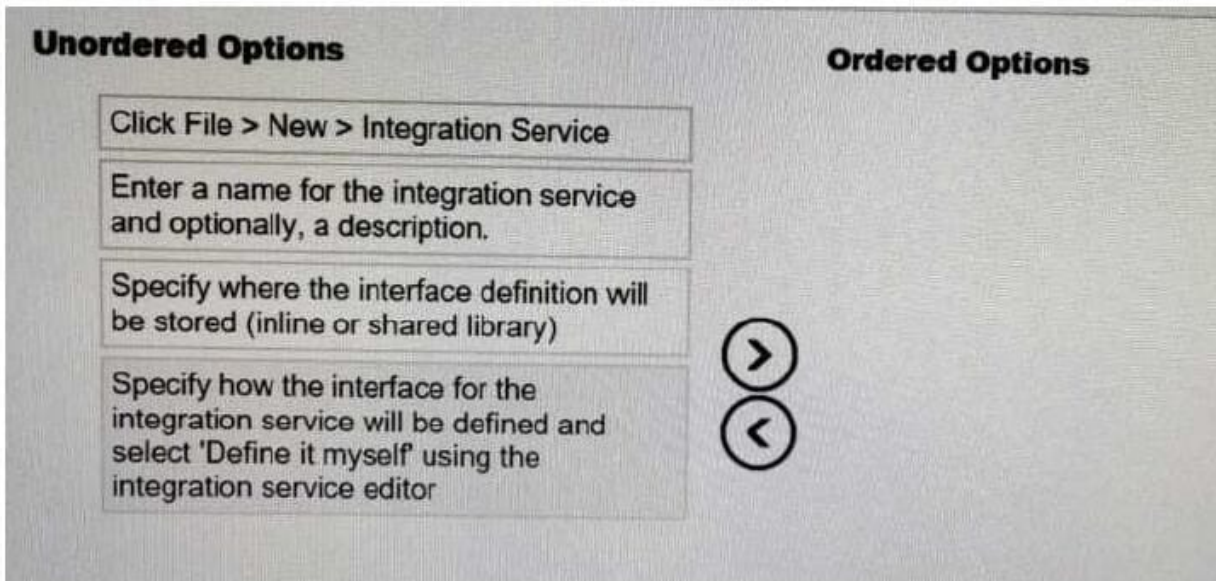

Correct Answer: C

QUESTION 9

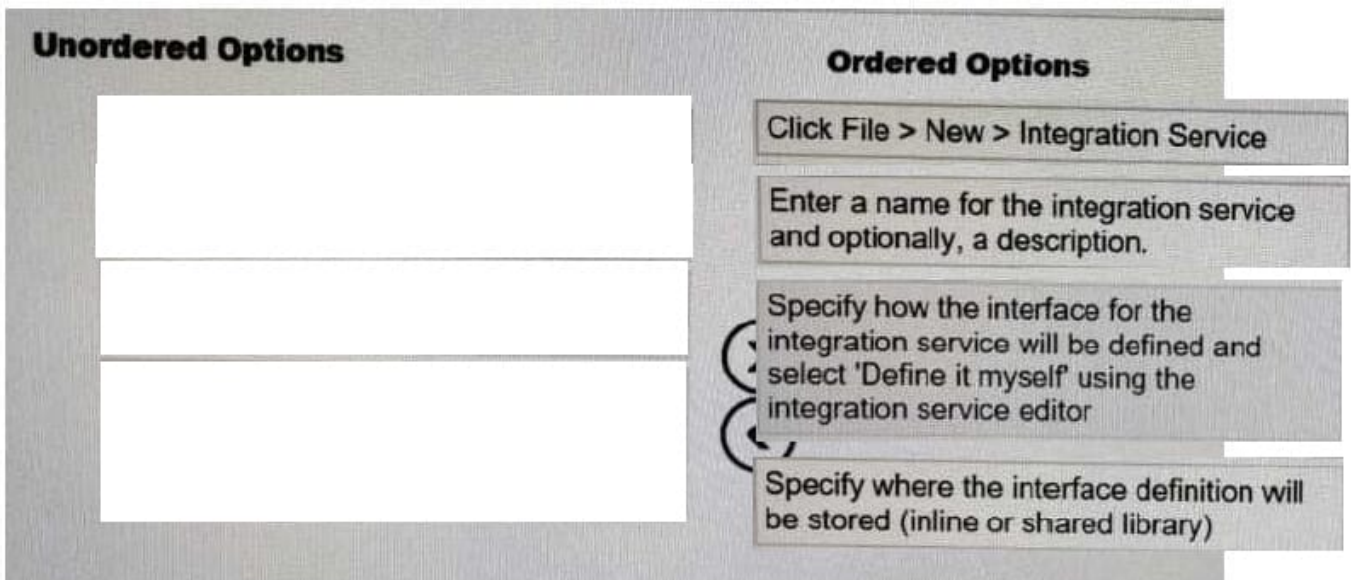

DRAG DROP

What is the correct order of steps to create an Integration Service from scratch?

Select and Place:

Correct Answer:

To create an integration service by defining a new interface, complete the following steps:

Procedure

- Open the New Integration Service wizard by using one of the following methods:
- Click File > New > Integration Service.
- In the Application Development view, click New > Start by creating an integration service.
- Right-click the white space of the Application Development view then click New > Integration Service.
- Enter a name for the integration service, and optionally a description.
- To specify how you want to define the interface for your integration service, select Define it myself using the integration service editor.
- Specify where you want to store your interface definition.
- If the definition will be used by this integration service only, store the definition in the integration service project.
- If the definition might be used by multiple integration services, store the definition in a shared library.

QUESTION 10

Event-driven flows can be configured to run at regular intervals by adding which type of node in IBM App Connect Designer?

- A. Event
- B. Scheduler
- C. Execute
- D. Timer

Correct Answer: A

QUESTION 11

What are two nodes that require IBM MQ to be installed on the same machine as IBM App Connect Enterprise?

- A. GroupGather
- B. FlowOrder
- C. Collector
- D. Route
- E. Resequence

Correct Answer: CE

https://www.ibm.com/support/knowledgecenter/SSTTDS_11.0.0/com.ibm.etools.mft.doc/bb28660_.html

QUESTION 12

Which prerequisite task must be done before encrypting a connection to an MQTT server?

- A. Create a connection from the MQTT server to the SSL server.
- B. Configure the Security identity property on the MQTT server to use encrypted message flow.
- C. Configure the MQTT server to communicate using JMT encryption.
- D. Create a truststore and import the MQTT server public certificate into the truststore.

Correct Answer: D

QUESTION 13

DRAG DROP

What is the correct order of prerequisite steps to install IBM App Connect Enterprise on IBM Cloud Private?

Select and Place:

The screenshot shows a drag-and-drop interface with two columns. The left column is titled "Unordered Options" and contains four items: "Manually sync the repositories", "Log in to the Docker private image registry", "Log into the cluster from the IBM Cloud Private CLI", and "Load the image from the Archive file". The right column is titled "Ordered Options" and is currently empty. Between the columns are two circular arrows, one pointing right and one pointing left, indicating the drag-and-drop functionality.

Correct Answer:

The screenshot shows the same drag-and-drop interface as above, but with the items in the "Ordered Options" column rearranged. The "Ordered Options" column now contains: "Log in to the Docker private image registry", "Manually sync the repositories", "Log into the cluster from the IBM Cloud Private CLI", and "Load the image from the Archive file". The "Unordered Options" column is now empty. The circular arrows between the columns remain.

QUESTION 14

What node category is used to enable integrations running in IBM App Connect on IBM Cloud for performing aggregation-style operations?

- A. Messaging Nodes
- B. Group Nodes
- C. Transaction Nodes
- D. Callable Nodes

Correct Answer: B

<https://developer.ibm.com/integration/blog/2018/10/08/ibm-app-connect-enterprise-now-supports-group-nodes/>

QUESTION 15

An Integration Project can contain which two resource types?

- A. Integration Service
- B. Message Flows
- C. Shared Libraries
- D. RestAPIs
- E. Message Maps

Correct Answer: BE
