QUESTION 1

A Mobile application developer is using IBM Mobile Foundation for the backend services. The application end users need access to the application data even when there is no network and the application is running offline. Which of the following IBM Mobile Foundation features will help in this scenario?

- A. JSONStore
- B. Mobile Foundation SDK
- C. AES 256 encryption and Data storage
- D. Mobile Foundation Adapters

Correct Answer: D

QUESTION 2

In an Event Driven Architecture, which two of the following IBM Cloud services could be considered an event source?

- A. Cloud HSM
- B. App ID
- C. IBM Blockchain platform
- D. PostgreSQL
- E. Portworx Enterprise

Correct Answer: AC

QUESTION 3

A developer has joined HalCo GmbH, working on a container-based project. The project architect has targeted Red Hat OpenShift on IBM Cloud cluster for the project implementation and deployment. HalCo's CISO has independently dictated that the company will use Twistlock for container vulnerability scanning on all projects and that each cluster must provide a results dashboard. What can the developer propose to integrate the two needs most efficiently?

- A. Configure the Vulnerability Advisor in the IBM Container Registry service to scan using the Twistlock API
- B. Deploy a Twistlock DaemonSet on your cluster to populate a dashboard in Grafana service.
- C. Configure an IBM Cognos Dashboard Embedded service in your application to report vulnerability findings from HalCo's central Twistlock repository
- D. Use IBM Cloud's Security Advisor and configure a Twistlock configuration URL provided by information security

Correct Answer: D

QUESTION 4

Which of the following is the benefit of IBM API Connect Developer Portal?

- A. Create different version of API
- B. Create Application and subscribes to IBM cloud catalog
- C. Analyze API usage
- D. Onboard new API mobile users

Correct Answer: A

QUESTION 5

When using the IBM Blockchain Platform, what is the \\first block\\ in a chain called?

- A. Merkle root
- B. Root node
- C. Genesis block
- D. Primordial block

Correct Answer: C

QUESTION 6

What does the IBM Cloud Virtual Server Auto Scale feature provide?

- A. Configures security group permissions
- B. Seamless and automatic scaling up of instances when more resources are required due to demand
- C. Flexible scaling based on RAM usage
- D. Provisioning on-premise servers

Correct Answer: B

QUESTION 7

A developer has been granted the Viewer role for the IBM Log Analysis with LogDNA Web UI and view logs. Which of the following actions will the user be able to achieve?

- A. Launch the Web UI and view logs in the Web UI
- B. View the list of service instances in the Observability Logging dashboard

- C. View service keys through the Web UI
- D. Review IAM permissions granted to other users

Correct Answer: B

QUESTION 8

In the context of cloud native, which of the following is a best practice for persistent data management?

- A. Applications can use cloud databases and storage, but backups should be stored on premise
- B. It should reside in relational databases, document databases/stores, or object stores
- C. Databases and storage should remain on premise to comply with industry and governmental regulations
- D. It should reside on a locally attached disk for fast access

Correct Answer: B

QUESTION 9

Which of the following can be used when a social networking site on Classic Infrastructure is expecting traffic to spike and requires more resources during the holiday season?

- A. Schedule-based
- B. Auto-Scaling
- C. Resource-based
- D. Network-based

Correct Answer: B

QUESTION 10

A DevOps team is provisioning environments in IBM Cloud during the development lifecycle. What can be done to optimize the environment provisioning process?

- A. Use Schematics service in IBM Cloud to create infrastructure as code templates and use the on DevOps pipeline to create and configure environments
- B. Use Chef scripts in the DevOps pipeline to create configuration tasks for application containers
- C. Use Virtual Machine templates in IBM Cloud to define environment configuration and start/stop them as needed
- D. Use Bare Metal Servers to configure the environments and have full control of them

Correct Answer: C

QUESTION 11

How can a container image with a known but otherwise mitigated security issue detected by the Vulnerability Advisor be provisioned onto an IBM Cloud Kubernetes Service?

- A. Edit the default policies of the Container Image Security Enforcement feature to allow the image to be deployed
- B. Edit the Kube-system ImagePolicy in IBM Cloud
- C. Create a ClusterImagePolicy object and apply to the cluster
- D. Permit image repositories by using IBM-system policy

Correct Answer: D

QUESTION 12

While building a chatbot with Watson Assistant, a developer wants to expand the dialog skill to avoid showing the message "I \\'m sorry, I\'m arraid I can\'t do that." to the user. What solutions can the developer use?

- A. The developer should completely change the Intent to allow the Watson Dialog Skill to recognize a wider dialog flow
- B. The developer can add a Watson Studio capability to analyze, cleanse and shape data and train machine learning models to enhance the Dialog Skill
- C. The developer can add a Search Skill to route complex customer inquiries to the IBM Watson Discovery service to treat the user input as a search query
- D. The developer should use the Watson OpenScale add-on to route inquiries to treat the user input as a search query

Correct Answer: D

QUESTION 13

Which two of the following are benefits of a Content Delivery Network (CDN)?

- A. Connects high speed direct links between your account and theirs to provide reliable low latency connections
- B. Mitigates distributed denial of service (DDoS) attacks, man-in-the-middle attacks, and other common attacks on web sites
- C. Copies web sites to a central location to deliver fast responses to improve customer satisfaction
- D. Provides infrastructure and bandwidth in planned remote locations at a predefined hourly rate
- E. Decreases impacts to website performance by reducing the effects of spikes or surges in demand

Correct Answer: AB

QUESTION 14

An enterprise in the auto manufacturing industry manages applications that run across multiple data centers, network zones, and scattered environments. The server Admin team is looking to have a single dashboard to seamlessly and consistently deploy applications running across multiple clouds and manage it all through that single dashboard. Which IBM Cloud Pak is recommended for this requirement?

- A. Cloud Pak for Data
- B. Cloud Pak Multicloud Manager
- C. Cloud Pak for Watson
- D. Cloud Pak for Applications

Correct Answer: D

QUESTION 15

To govern unstructured data sources in IBM Cloud Pak for Data, which system must be integrated with IBM Cloud Pak for Data?

- A. IBM Guardium
- B. IBM InfoSphere Information Server
- C. IBM StoredIQ
- D. IBM Cognos Analytics

Correct Answer: A
