QUESTION 1

You want to use the different options for planning in SAP ECC. What is the correct sequence of the planning procedures?

- A. Sales and operations planning -> Demand management -> Long-term planning -> Material requirements planning -> Capacity planning
- B. Demand management -> Sales and operations planning -> Capacity planning -> Long- term planning > Material requirements planning
- C. Material requirements planning -> Demand management -> Sales and operations planning -> Longterm planning -> Capacity planning
- D. Long-term planning -> Sales and operations planning -> Demand management -> Material requirements planning -> Capacity planning

Correct Answer: A

QUESTION 2

In SAP ECC, you calculate the standard available capacity for a work center capacity using the following data:

- Start: 7:00:00 a.m.
- End: 3:00:00 p.m.
- Break duration: 1 hour
- Rate of utilization: 80%
- Overload: 110%

-

Number of individual capacities: 1 How large is the standard available capacity?

- A.
8 hours
- B.
5.6 hours
- C.
6.16 hours
- D.
7 hours

Correct Answer: B

QUESTION 3

Which of the following requirements for a manufacturing plant can be supported by using process manufacturing? (Choose three.)

- A. Master recipe-based manufacturing.
- B. Material requirements planning for production resources.
- C. Manufacturing without orders.
- D. Variable calculation of material quantities (product output, material usage).
- E. Manufacturing in charge quantities.

Correct Answer: ADE

QUESTION 4

Which of the following statements best defines SAP ERP?

- A. SAP ERP is an application that supports all processes involving direct customer contact throughout the entire customer relationship life cycle.
- B. SAP ERP is an application that a company can use to manage its business processes efficiently.
- C. SAP ERP is a system in which advanced planning and optimization processes can be mapped.
- D. SAP ERP is a system hardware that includes components such as Purchasing, Sales and Distribution, Materials Management, and Production.

Correct Answer: B

QUESTION 5

Which data forms the basis for calculating the capacity requirement for an operation? (Choose three.)

- A. Standard values (routing)
- B. In-house production time (material master)
- C. Transport time (routing)
- D. Formulas (work center)
- E. Operation control key (routing)

Correct Answer: ADE

QUESTION 6

Which of the following statements about consumption are correct? (Choose two)

- A. Consumption takes place on the material level between the planned independent requirements and the planned orders.
- B. Consumption parameters (consumption mode and consumption interval) can be set in the material master or in the MRP group.
- C. Consumption is restructured with the planning run.
- D. Consumption can take place between order reservations and planned independent requirements, depending on the strategy.

Correct Answer: BD

QUESTION 7

Which property applies for consumption with planning strategy 40 (planning with final assembly)?

- A. Consumption creates a static and binding assignment between the planned independent requirements and the customer requirements for the entire procurement process.
- B. Consumption takes place with the planning material.
- C. Consumption can reduce the total originally planned production quantity.
- D. Consumption can increase the total originally planned production quantity.

Correct Answer: D

QUESTION 8

Which option for selecting a routing exists when you create a production order?

- A. Automatic selection of a reference operation set
- B. Manual selection based on settings in the order type-dependent parameters
- C. Automatic selection based on the selection ID in the material master
- D. Manual selection based on the list of routings maintained in the material master

Correct Answer: B

QUESTION 9

Which of the following statements about the planning functions available in SAP ECC is correct?

- A. Master production scheduling (MPS) refers to preferred planning of important materials.
- B. Material requirements planning (MRP) includes automatic capacity leveling.
- C. Long-term planning (LTP) is a long-term form of forecast planning.
- D. In demand management (DM) material shortage situations are identified and corresponding receipt elements are created.

Correct Answer: A

QUESTION 10

When maintaining a work center, formulas can be assigned in the scheduling view. Formulas use formula parameters for calculation.

What can be the origin of the formula parameters used for scheduling? (Choose three)

- A. User-defined fields in the operation of routings
- B. General operation values of routings
- C. General item values of bill of materials
- D. General values from work scheduling view of the material master
- E. Standard values in the operations of routings

Correct Answer: ABE

QUESTION 11

Which of the following statements about the SAP Solution Manager listed is correct?

- A. Solution Manager is part of the SAP ECC System.
- B. Solution Manager is an add-on industry solution.
- C. Solution Manager is a stand-alone system that communicates with other systems in a system landscape.
- D. Solution Manager is a satellite system in a system landscape.

Correct Answer: C

QUESTION 12

Where in the SAP ECC system can you define production versions?

- A. In the material master
- B. In the routing
- C. In the bill of material
- D. In the work center

Correct Answer: A

QUESTION 13

Which of the following elements can be used in a process order? (Choose three)

- A. Process instructions
- B. Parallel sequences
- C. Relationships
- D. Suboperations
- E. Phases

Correct Answer: ACE

QUESTION 14

A material was planned in the context of SAP ECC material requirements planning. The MRP controller subsequently processed the material by manually converting a specific planned order into a production order. The MRP controller now accesses the current stock/requirements list and the MRP list for this material and compares these two lists.

What do you have to consider for the two lists at this stage? (Choose two)

- A. The stock/requirements list was updated the moment it was accessed.
- B. The MRP list displays the production order.
- C. The MRP list has the status "processed".
- D. The stock/requirements list displays the production order.

Correct Answer: AD

QUESTION 15

Which of the following organizational efforts can be minimized using the KANBAN procedure?

- A. Effort for material staging
- B. Effort for capacity planning
- C. Effort for Sales and Operations Planning (SOP)
- D. Effort for master data maintenance

Correct Answer: A
