

# H13-511\_V4.0<sup>Q&As</sup>

HCIA Cloud Computing V4.0

## Pass Huawei H13-511\_V4.0 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

[https://www.pass2lead.com/h13-511\\_v4-0.html](https://www.pass2lead.com/h13-511_v4-0.html)

100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by Huawei  
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

In a NAS environment, multiple hosts writing to a file at the same time will cause data consistency issues.

- A. True
- B. False

Correct Answer: A

---

**QUESTION 2**

The following description of Huawei Virtual Switch is correct ()

- A. The virtual switching function of the intelligent network card is also provided by Huawei Virtual Switch
- B. Huawei virtual switch is open source open vSwitch
- C. If Huawei distributed switch has multiple virtual ports, each port has its own attributes
- D. Huawei virtual switches are divided into standard virtual switches and distributed virtual switches

Correct Answer: B

---

**QUESTION 3**

In Huawei FusionCompute, a Linux-based virtual machine is created. In this scenario, the host OS Running at

- A. VNA
- B. CNA
- C. VRM
- D. Linux virtual machine

Correct Answer: B

---

**QUESTION 4**

In Huawei FusionCompute, a virtual machine can have multiple virtual network adapters.

- A. TURE
- B. FALSE

Correct Answer: A

---

**QUESTION 5**

Virtualization is divided into computing virtualization, storage virtualization and network virtualization, corresponding to cloud computing cloud host, cloud storage, cloud network

- A. yes
- B. wrong

Correct Answer: A

---

**QUESTION 6**

Memory reuse is a resource allocation scheme that increases the density of virtual machines on a single host, reduces costs, and sacrifice performance for density.

- A. TRUE
- B. FALSE

Correct Answer: B

---

**QUESTION 7**

For FusionCompute, the following incorrect description of the template format is

- A. .ovf is the description file of the virtual machine and .vhd is the disk file of the virtual machine
- B. The virtual machine template format is divided into two types: ova and ovf.
- C. ovf format template contains only one ovf file and one vhd file
- D. Format template contains only one file after export

Correct Answer: D

---

**QUESTION 8**

In Huawei FusionCompute, what functions will be affected when a virtual machine is bound to a USB device? [Multiple choice]

- A. Virtual machine resource expansion
- B. Virtual machine restart
- C. Virtual Machine Live Migration
- D. Cluster scheduling strategy

Correct Answer: CD

---

**QUESTION 9**

The weakest data redundancy of the following RAID levels is ()

- A. RAID 1
- B. RAID 6
- C. RAID 0
- D. RAID 5

Correct Answer: C

---

**QUESTION 10**

The following incorrect description of iSCSI and Fibre Channel is ().

- A. The FC protocol is completely heterogeneous with the existing Ethernet and has poor compatibility.
- B. iSCSI runs on Ethernet based on TCP / IP protocol and can be seamlessly integrated with existing Ethernet
- C. FC has a longer transmission distance than TCP / IP
- D. From the perspective of the transport layer, Fibre Channel uses the FC protocol, and iSCSI uses the TCP / IP protocol.

Correct Answer: C

---

**QUESTION 11**

In Huawei FusionCompute, FusionStorage can be used as a virtualized storage

- A. TRUE
- B. FALSE

Correct Answer: B

---

**QUESTION 12**

When using the same Window template to quickly deploy a virtual machine, the SIDs generated may be consistent. As a result, some special software will fail when installed

- A. True
- B. False

Correct Answer: A

---

**QUESTION 13**

. The following incorrect description of Huawei FusionCompute architecture is

- A. CNA provides computing resources for virtual machines
- B. VRM can run on CAN or can be deployed on a separate physical machine
- C. VRM provides a management portal for administrators
- D. CNA can manage cluster network, storage and computing resources // all of the cluster

Correct Answer: D

---

**QUESTION 14**

Among the following RAID levels, the highest utilization of disk space is

- A. RAID 0
- B. RAID 6
- C. RAID 1
- D. RAID 5

Correct Answer: A

---

**QUESTION 15**

Which of the following network file sharing protocols does the NAS support (multiple choice)

- A. CIFS
- B. NFS
- C. NTFS
- D. FTP

Correct Answer: AB
