**QUESTION 1**

The SIMPNANA software suite of CommVault uses a relational database as the Index and adopts a two-level distributed architecture?

A. True

B. False

Correct Answer: A

**QUESTION 2**

Huawei HiCloud platform is designed based on the mainstream microservice architecture in the industry and supports fast iteration and elastic scaling.

A. True

B. False

Correct Answer: A

**QUESTION 3**

Which of the following is applicable to file-level migration in cloud-data center migration scenarios?

A. The planned disk space of the destination VM is expanded or reduced compared with that of the source VM

B. Hosts containing a large number of small files

C. Ensure that the partition is consistent with that on the source end

D. Host with high disk usage

Correct Answer: D

**QUESTION 4**

In the cloud data center migration scenario, the Oracle database layer migration solution can be classified into physical migration and logical migration on data block change modes.

A. True

B. False

Correct Answer: B

**QUESTION 5**

Which of the following statements about the Oracle database is incorrect?

A. The memory area and process that constitute an instance are responsible for managing database data and providing services for multiple users

B. An Oracle process is called an Oracle instance

C. Each running Oracle database is associated with an Oracle instance

D. The Oracle server is database management system that provides open, comprehensive, and integrated methods for information management

Correct Answer: A

**QUESTION 6**

Which of the following statements are CORRECT about the host that provides external block storage for Cinder?

A. Cinder-API provides an interface for processing block storage access requests

B. The Cinder-Volume service is responsible for dealing with storage servers, such as Swift and Ceph, to create and delete volumes

C. The Cinder-Scheduler assigns tasks to servers that provide block storage

D. Cinder modules work in message queue mode

Correct Answer: A

**QUESTION 8**

After the recovery policy of Huawei DR software BCManager-eReplication is deployed, you must perform the test until the test is passed. In this case, failover or planned migration can be implemented.

A. True

B. False

Correct Answer: A

**QUESTION 9**

For the Cloud Management Platform (CMP), common users can apply for cloud services in one-click mode through the service store, or apply for cloud services in seven steps.

A. True

B. False

Correct Answer: B

**QUESTION 10**

ITIL best practices refer to the advanced ITSM methodology to understand enterprise requirements and

implement sustainable management during IT service management.

Which of the following is the IT service operation process in the ITIL best practice system?

A. Event management, incident management, problem management, request fulfillment, and access management

B. Incident management, problem management, service desk, request fulfillment, and event management

C. Incident management, service desk, request fulfillment, access management, and event management

D. Event management, incident management, change management, and access management

Correct Answer: A

**QUESTION 11**

Which of the following are physical migration solutions in the Oracle database migration solution?

A. Data pump

![Pass2Lead](https://Pass2Lead.com)
B. TTS transmission tablespace

C. RMAN backup and restoration

D. Cold backup and restoration

Correct Answer: A

---

**QUESTION 12**

To prevent data loss caused by misoperations, system faults, or other man-made factors, data of the entire system or a part of critical data is copied from a storage device of the primary computer system to another storage device by using a certain method, which of the following is not keypoint of a backup system?

A. RTO

B. HA

C. BW

D. RPO

Correct Answer: B

---

**QUESTION 13**

Provides distributed monitoring solutions, including monitoring events and monitoring performance. The former is used to detect the causes of abnormal IIS running, and the latter is used to establish the user

system performance benchmark.

Which of the following software is used to monitor the system?

A. Zabbix

B. Python

C. Cobbler

D. SaltStack

Correct Answer: D

---

**QUESTION 14**

Nova is a virtual server deployment and service computing module developed by NASA. Which of the following statements about common terms in components is incorrect?

A. Flavor refers to the configuration template created for the VM instance

B. Security group rules are used to define remote access permissions for users

C. keypair refers to the key pair used when a user remotely connects to an instance through SSH

D. A security group is a group that assigns instances to start and stop operations

Correct Answer: C

**QUESTION 15**

In the service migration scenario, which of the following statements about the service switchover procedure is incorrect?

A. After the new server is enabled; you do not need to change the corresponding record on the DNS server

B. For all service systems that connect to the source server, set the connection change to the destination server

C. After the migration, check the system CPU, memory, and network performance and service access

D. Stop the source server, synchronize data again (prevent new data generated during the migration), and enable the destination server

Correct Answer: D
