-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

QUESTION 1

DRAG DROP

After HPE Superdome Flex deployment and nPar setup, you need to verify health status of HPE Superdome Flex components.

Put the steps on the left into the coned order on the right to perform this task.

Select and Place:

- Enter show health command.
- Confirm health status.
- Open SSH client.
- Open session to RMC.

- 1
- 2
- 3
- 4

Correct Answer:

- 1
- 2
- 3
- 4

- 1 Open SSH client.
- 2 Open session to RMC.
- 3 Enter show health command.
- 4 Confirm health status.

QUESTION 2

HOTSPOT

Your customer is implementing an HPE Synergy solution based on three frames.

Click each of the ports that can be used to connect satellite modules.

Hot Area:

Correct Answer:

QUESTION 3

DRAG DROP

Your customer plans to use HPE OneView for VMware vCenter Server to deploy ESXi systems. They created a server profile template that they want to use in HPE OneView.

Put the steps required to configure HPE OneView for VMware vCenter Server on the left into their correct order on the right.

Select and Place:

Steps

- Add HPE OneView credentials to the vCenter Server and create OS Deployment Plan.
- Add vCenter Server to HPE OneView for VMware vCenter Server.
- Deploy new ESXi systems using vCenter Server interface.
- Upload HPE-friendly ESXi image.

Answer Area

Correct Answer:

Steps

Answer Area

- Add vCenter Server to HPE OneView for VMware vCenter Server.
- Add HPE OneView credentials to the vCenter Server and create OS Deployment Plan.
- Upload HPE-friendly ESXi image.
- Deploy new ESXi systems using vCenter Server interface.

QUESTION 4

DRAG DROP

Match each HPE Synergy logical component with the definition.

Select and Place:

Component		Definition
Enclosure group		Acts as a recipe for creating a group that represents the available networks, uplink sets, and interconnect settings for a set of physical interconnects in a set of enclosures.
Logical enclosure		A single administrative entity that consists of the configuration for a set of interconnects in a single enclosure or a frame link topology.
Logical interconnect		A logical resource that defines a consistent configuration for an enclosure or a set of enclosures making up a logical enclosure.
Logical interconnect group		Contains the configuration intended for a set of physical enclosures.

Correct Answer:

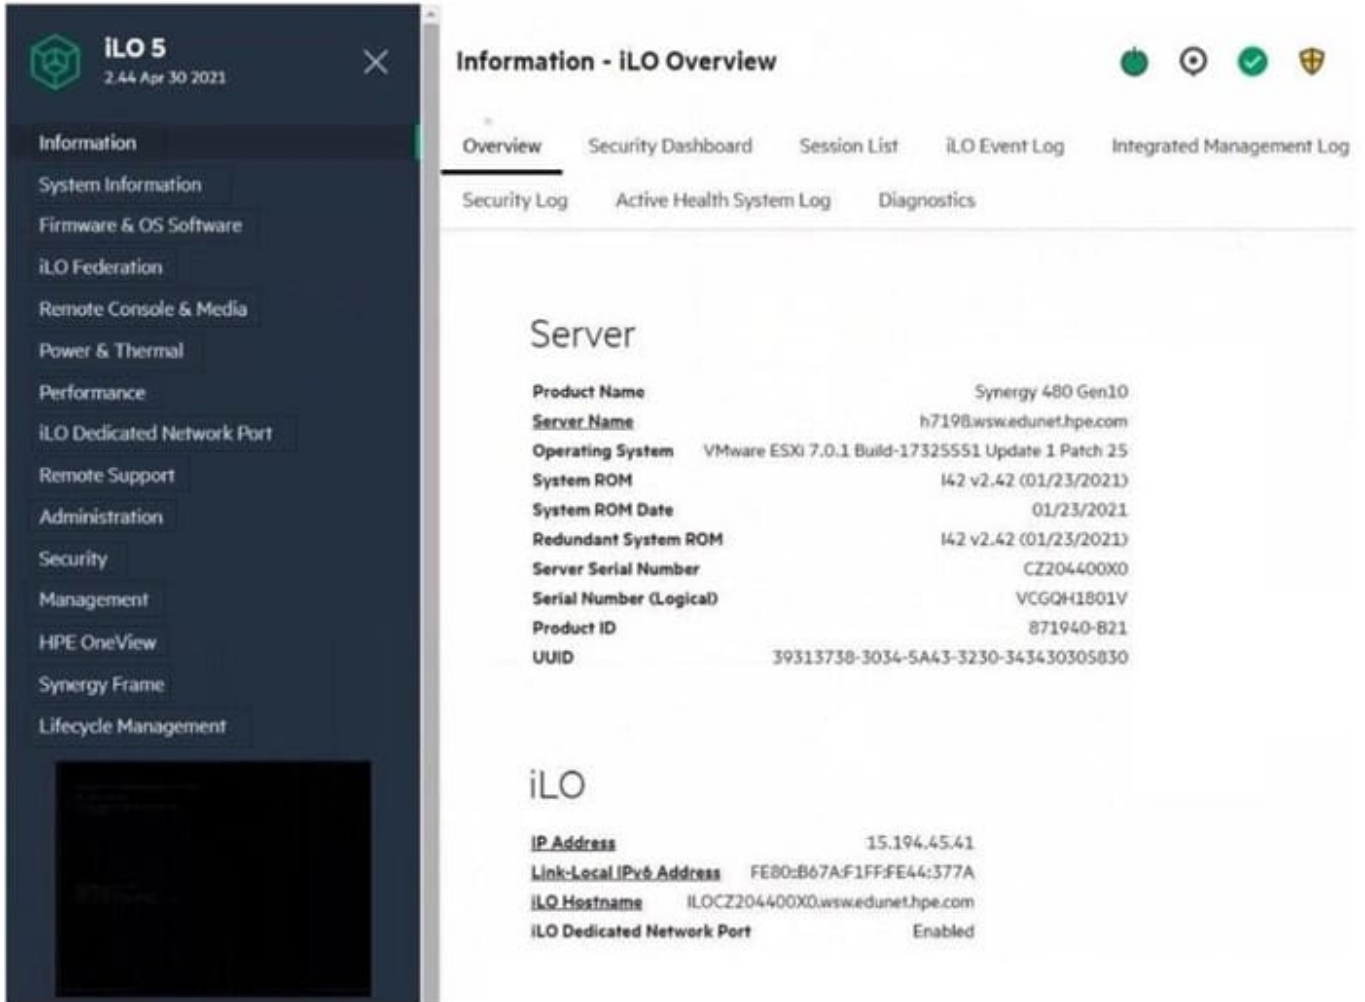

Component		Definition
	Logical interconnect group	Acts as a recipe for creating a group that represents the available networks, uplink sets, and interconnect settings for a set of physical interconnects in a set of enclosures.
	Logical interconnect	A single administrative entity that consists of the configuration for a set of interconnects in a single enclosure or a frame link topology.
	Enclosure group	A logical resource that defines a consistent configuration for an enclosure or a set of enclosures making up a logical enclosure.
	Logical enclosure	Contains the configuration intended for a set of physical enclosures.

QUESTION 5

HOTSPOT

Click the area within the iLO management interface that will allow you to access workload Advisor.

Hot Area:

Correct Answer:

iLO 5

iLO Hostname	ILOCCZ204400X0.wsw.edunet.hpe.com
iLO Dedicated Network Port	Enabled

QUESTION 6

DRAG DROP

Match each HPE OneView network type with its definition.

Select and Place:

Network Type	Definition
Internal network	A network that contains multiple networks on a single uplink set that allows your customer to share uplinks with those networks.
Tagged network	A network in which any tagged packets are dropped and forwarding is done by a MAC address.
Tunnel network	A network with a dedicated set of uplink ports used to pass a group of VLANs without changing the VLAN tags.
Untagged network	A network that does not utilize any uplink ports and is used for communication between servers in the same frame.

Correct Answer:

Network Type	Definition
Untagged network	A network that contains multiple networks on a single uplink set that allows your customer to share uplinks with those networks.
Tagged network	A network in which any tagged packets are dropped and forwarding is done by a MAC address.
Tunnel network	A network with a dedicated set of uplink ports used to pass a group of VLANs without changing the VLAN tags.
Internal network	A network that does not utilize any uplink ports and is used for communication between servers in the same frame.

QUESTION 7

HOTSPOT

Click the option that will allow you to change the ESXI image used In an OS Deployment Plan.

Hot Area:

Correct Answer:

QUESTION 8

DRAG DROP

You need to setup HPE Synergy frames after hardware components are discovered within HPE OneView.

Put the steps to achieve this goal into the coned order in the answer area on the right.

Select and Place:

Steps	Answer Area
Create a logical enclosure.	
Create a logical interconnect group with uplink sets.	
Create an enclosure group.	
Create server profile templates and server profiles.	
Define all required networks.	

Correct Answer:

Steps	Answer Area
	Create a logical interconnect group with uplink sets.
	Create a logical enclosure.
	Create an enclosure group.
	Create server profile templates and server profiles.
	Define all required networks.

QUESTION 9

HOTSPOT

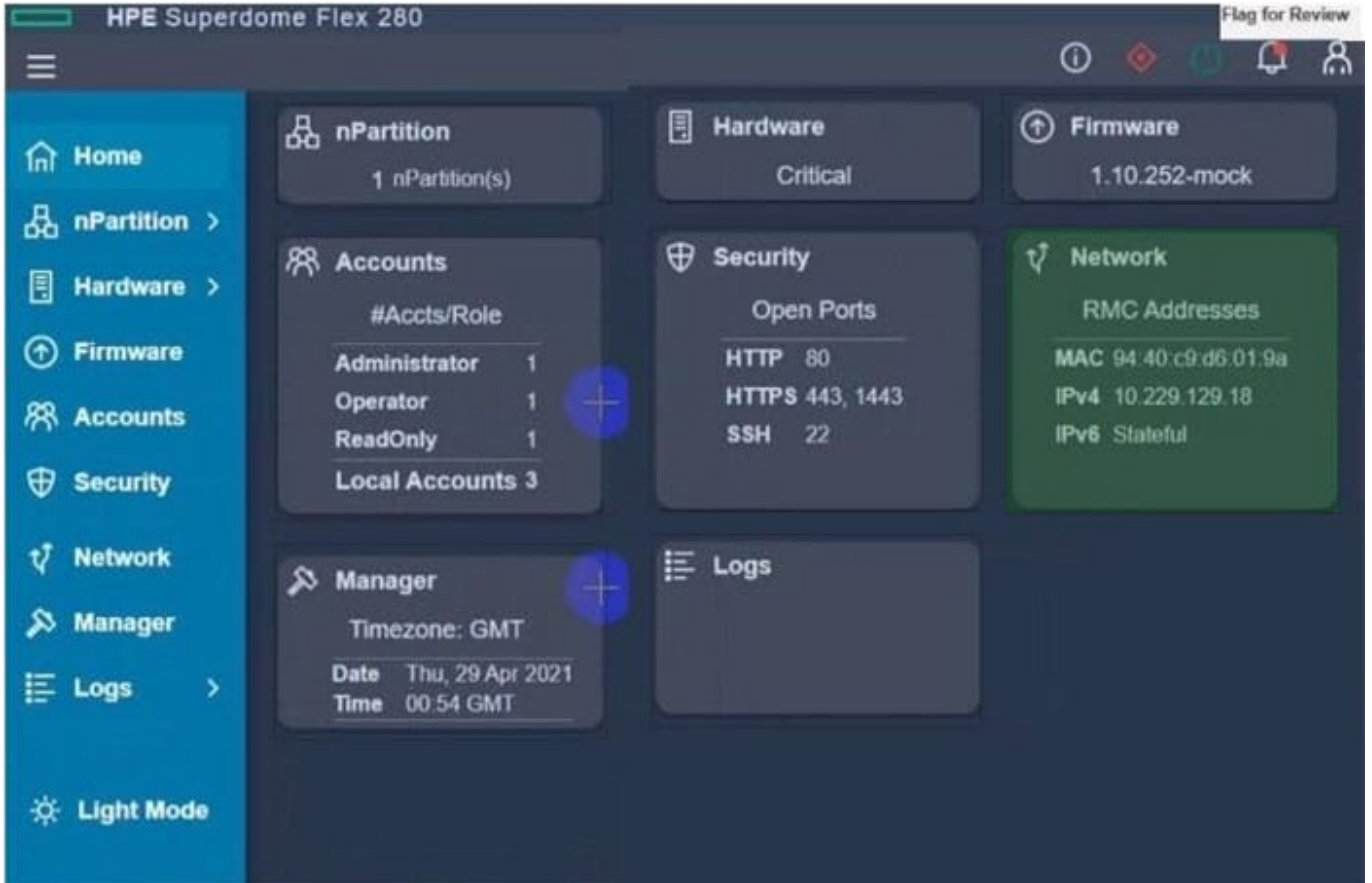

After deploying HPE Superdome Flex 280 you need to check Core Analysis Engine (CAE) Log.

Click the appropriate section in the HPE Superdome Flex 280 management interface that will allow you to complete this task.

Hot Area:

Correct Answer:

QUESTION 10

HOTSPOT

Click the drop-down menu that will allow you to define the location of the master modules within the logical interconnect group.

Hot Area:

Create Logical Interconnect Group

General ?

General

Name

Logical Interconnect Group

Using the selectors below, describe the logical interconnect group to be created and then click "Select interconnects" to see the bay and interconnect choices.

Interconnect type	<input type="text" value="Virtual Connect SE 100Gb F32 Module for Synergy"/>
Enclosure count	<input type="text" value="3"/>
Interconnect bay set	<input type="text" value="3"/>
Redundancy	<input type="text" value="Redundant"/>
Downlink speed	<input type="text" value="25 Gb/s"/>

Correct Answer:

Create Logical Interconnect Group

General ▾ ?

General

Name

Logical Interconnect Group

Using the selectors below, describe the logical interconnect group to be created and then click "Select interconnects" to see the bay and interconnect choices.

Interconnect type

Enclosure count

Interconnect bay set

Redundancy

Downlink speed

Select interconnects

QUESTION 11

DRAG DROP

Match HPE SimpliVity team with the definition.

Select and Place:

Term	Definition
Arbiter	Non-hyperconverged servers that can exist in an HPE SimpliVity environment and provide additional compute capacity while consuming the storage provided by the hyperconverged nodes.
Compute node	Provides centralized management and events end-point for vCenter.
Intelligent Workload Optimizer	Integrates with VMware Distributed Resources Scheduler to ensure optimal placement of the VM compute resources.
Management Virtual Controller	Facilitates communication between nodes and resolves state conflicts to ensure service continuity.

Correct Answer:

Term	Definition
Arbiter	Non-hyperconverged servers that can exist in an HPE SimpliVity environment and provide additional compute capacity while consuming the storage provided by the hyperconverged nodes.
Compute node	Provides centralized management and events end-point for vCenter.
Management Virtual Controller	Integrates with VMware Distributed Resources Scheduler to ensure optimal placement of the VM compute resources.
Intelligent Workload Optimizer	Facilitates communication between nodes and resolves state conflicts to ensure service continuity.

QUESTION 12

DRAG DROP

Put the steps of the HPE infositght flow in the correct order.

Select and Place:

Steps

- Observing
- Learning
- Recommending
- Predicting
- Acting

Answer Area

-
-
-
-
-

Correct Answer:

Steps

Answer Area

- Observing
- Learning
- Predicting
- Recommending
- Acting

QUESTION 13

DRAG DROP

Match HPE SimpliVity term with the definition.

Select and Place:

Term		Definition
Arbiter	<input type="text"/>	Non-hyperconverged servers that can exist in an HPE SimpliVity environment and provide additional compute capacity while consuming the storage provided by the hyperconverged nodes.
Compute node	<input type="text"/>	Provides centralized management and events end-point for vCenter.
Management Virtual Controller	<input type="text"/>	Integrates with VMware Distributed Resources Scheduler to ensure optimal placement of the VM compute resources.
Intelligent Workload Optimizer	<input type="text"/>	Facilitates communication between nodes and resolves state conflicts to ensure service continuity.

Correct Answer:

Term		Definition
<input type="text"/>	Arbiter	Non-hyperconverged servers that can exist in an HPE SimpliVity environment and provide additional compute capacity while consuming the storage provided by the hyperconverged nodes.
<input type="text"/>	Compute node	Provides centralized management and events end-point for vCenter.
<input type="text"/>	Management Virtual Controller	Integrates with VMware Distributed Resources Scheduler to ensure optimal placement of the VM compute resources.
<input type="text"/>	Intelligent Workload Optimizer	Facilitates communication between nodes and resolves state conflicts to ensure service continuity.

QUESTION 14

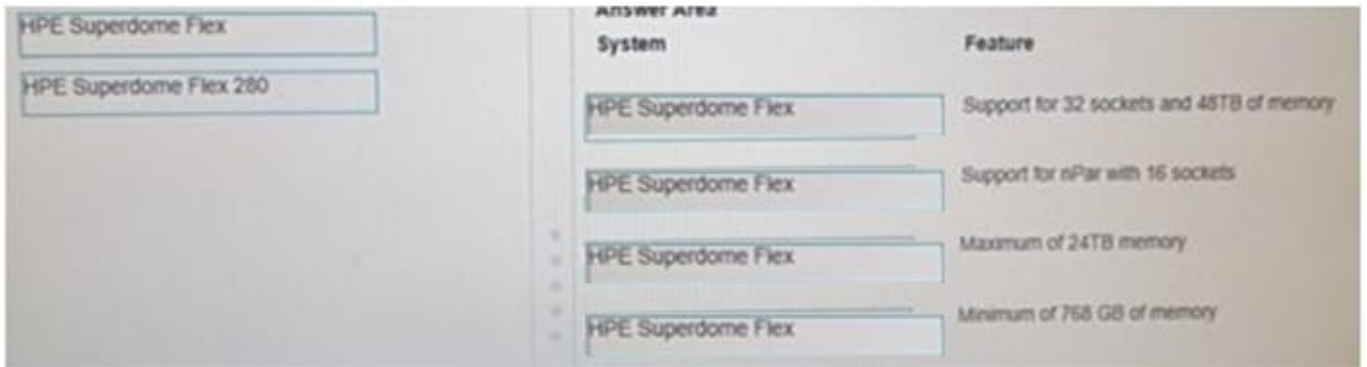

DRAG DROP

Match HPE Superdome Flex system with its specific feature.

Select and Place:

Correct Answer:

QUESTION 15

HOTSPOT

An HPE Synergy customer needs to prevent a timeout and loss of communication during an external switch firmware upgrade.

Click the parameter that the customer should configure within an uplink set to meet this requirement.

Hot Area:

Create Uplink Set ?

General

Name	<input type="text" value="Prod-US"/>
Consistency checking	<input type="text" value="Exact match"/>
Type	<input type="text" value="Ethernet"/>
Connection mode	Automatic
LACP timer	<input type="text" value="Short (1s)"/>
LACP load balancing	<input type="text" value="Source & Destination MAC Address"/>
LACP failover trigger	<input type="text" value="All active uplinks transition to offline"/>
LACP distribute uplink ports	<input checked="" type="checkbox"/>

Correct Answer:

Create Uplink Set ?

General

Name

Consistency checking

Type

Connection mode

LACP timer

LACP load balancing

LACP failover trigger

LACP distribute uplink ports
