QUESTION 1

DRAG DROP

Match the security features of HPE OneView with their use cases.

Select and Place:

Feature		Use Case	
Certifcate based trust		Identity validation for management network transactions.	
Role based access control		Secure form of user authentication based on "what you know" and "what you have".	
Scope based access control		Restriction of user rights to a subset of resources within the infrastructure.	
Two-factor authentication		Restriction of user rights to perform actions (create, read, update, delete, or use) to specific resources within a category.	

Correct Answer:

Feature	Use Case	
	Identity validation for management network transactions.	Two-factor authentication
	Secure form of user authentication based on "what you know" and "what you have".	Certificate based trust
	Restriction of user rights to a subset of resources within the infrastructure.	Scope based access control
	Restriction of user rights to perform actions (create, read, update, delete, or use) to specific resources within a category.	Role based access control

QUESTION 2

A server administrator wants to prevent excessive unknown destination frames from affecting the network performance of Synergy compute modules. Which HPE OneView setting at the Logical Interconnect Group level can help?

A. SNMPv3

B. loop protection

C. storm control

D. IGMP snooping

Correct Answer: B

QUESTION 3

Which option from the HPE OneView main menu provides the utilization data for a server?

A. Server Hardware

B. Data Centers

C. Settings

D. Power Delivery Devices

Correct Answer: A

QUESTION 4

What functionality does Storm Control provide in HPE OneView?

A. Prevents malware from hiding embedded code in the network traffic.

B. Prevents network performance degradation by suppressing excessive inbound broadcasts.

C. Prevents duplicate MAC addresses and WWNs from occurring in HPE OneView.

D. Prevents resource exhaustion on the switch by throttling data flow on network interfaces.

Correct Answer: B

Storm Control is a new feature that allows network admin to suppress excessive inbound multicast, broadcast, and destination lookup failure (DLF) packets when user specified threshold is reached

QUESTION 5

A customer has a mixture of Gen8 and newer DL and BL devices. They want to enable support automation and run inventory reports on their devices. They are currently using Insight Control but are considering HPE OneView. They can\\'t have any downtime on the devices if they change management strategies. What option is most efficient for them?

A. Move to HPE OneView Advanced with Remote Support enabled.

B. Move to HPE OneView Standard with Remote Support enabled.

![Pass2Lead](https://Pass2Lead.com)
C. Stay on Insight Control and activate a Proactive Care contract.

D. Stay on Insight Control and enable Insight Online.

Correct Answer: A

QUESTION 6

Refer to the exhibit.

A solution architect is setting up a Synergy configuration for a customer. The customer wants their redundancy level to be Highly Available. What is preventing this option from being available for the customer?
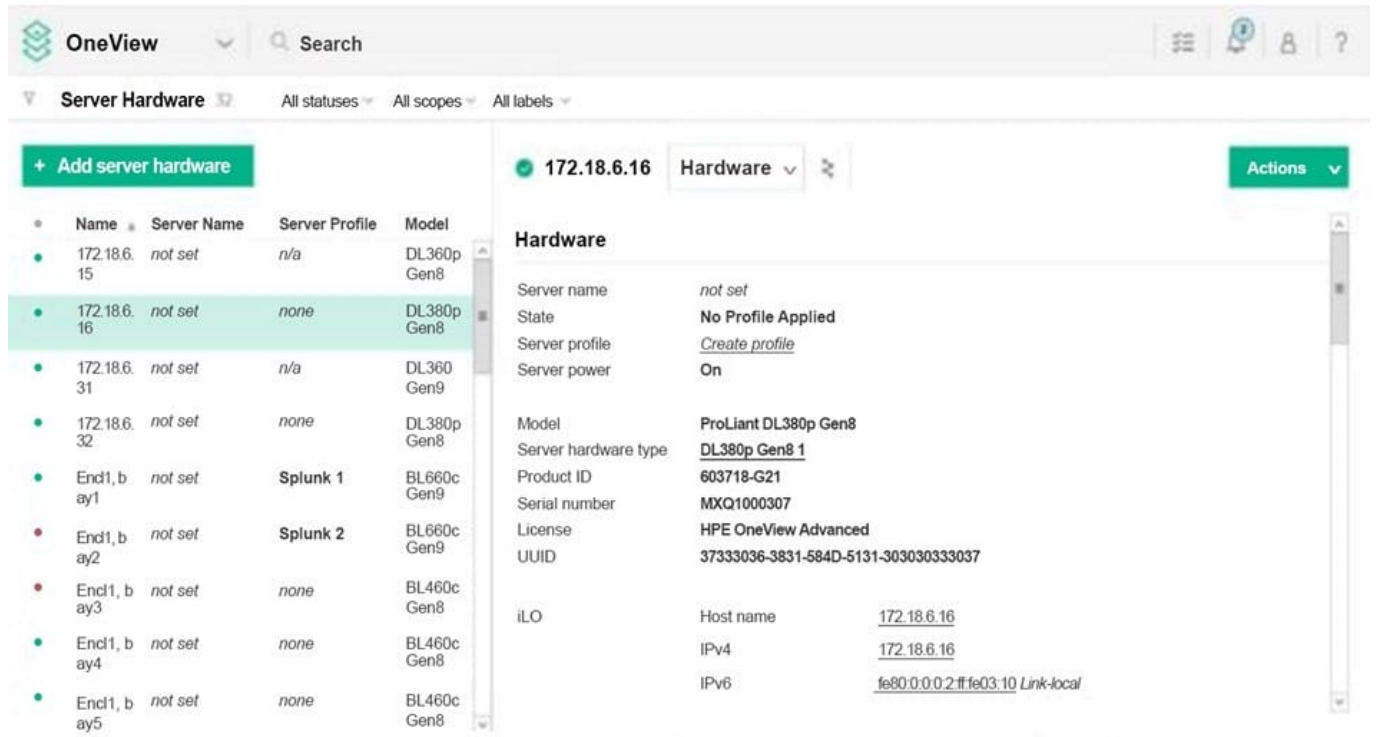

A. Synergy doesn\\'t support an HA fabric configuration on the Virtual Connect SE 40GB F8 module for Synergy.

B. HA is not supported in Interconnect Bay set 3.

C. HA requires multiple frames in the fabric domain.

D. HA is only supported in mixed speed environments.

Correct Answer: D

QUESTION 7

Refer to the exhibit.

A customer is having issues assigning a server profile to a DL380 Gen8. Using the following figure, what is the most likely cause preventing the server profile from being assigned?

A. The server name is not set.

B. The server is in monitored mode.

C. Server Profiles are not supported on DL servers.

D. The server is powered on.

Correct Answer: B

QUESTION 8

DRAG DROP

Match the HPE OneView element to its function.

Select and Place:

Element	Function	
metric streaming message bus (MSMB)	Used by message bus consumers to carry out CRUD operations	
RESTful API	Provide information about changes in managed resources	
state change message bus (SCMB)	Provide temperature, power, or CPU utilization for managed resources	

Correct Answer:

Element	Function	
	Used by message bus consumers to carry out CRUD operations	RESTful API
	Provide information about changes in managed resources	state change message bus (SCMB)
	Provide temperature, power, or CPU utilization for managed resources	metric streaming message bus (MSMB)

QUESTION 9

A customer has a single BladeSystem environment running Virtual Connect and VMware ESXi. The customer wants to manage the enclosure with HPE OneView. What must the customer consider?

A. The Management Ring cannot talk to the production VLAN.

B. The HPE OneView appliance cannot reside in an enclosure it manages.

C. Virtual Connect Enterprise Manager (VCEM) is not supported with VMware.

D. HPE OneView for VMware vCenter is licensed separately at an additional cost.

Correct Answer: B

QUESTION 10

Your customer is running ESXi on an HPE BladeSystem managed by HPE OneView. They want to be able to add networks to the ESXi system without modifying the Virtual Connect configuration. Which type of network should be used?

A. mapped

B. tagged

C. tunnel

D. untagged

Correct Answer: A

QUESTION 11

An administrator is configuring a server profile template, but does not see the Ethernet network called "VLAN 210" that had been created earlier. What could be the cause?

A. VLAN 210 was never configured in the Logical Interconnect Group.

B. VLAN 210 is already in a Network Set.

C. VLAN 210 does not exist on the upstream switches.

D. VLAN 210 has Private Network enabled.

Correct Answer: C

QUESTION 12

How does HPE OneView simplify infrastructure management? (Choose two.)

A. Provides unified platform that supports management across compute, storage, and fabric

B. Provides industry leading infrastructure security through hardware root of trust

C. Manages physical servers and virtual machines

D. Provides integrations with 3rd party infrastructure automation tools through an API driven interface

Correct Answer: AD

QUESTION 13

You need to add an HPE ProLiant DL380 Gen10 server to the HPE OneView appliance for monitoring. Which information is required to complete this task? (Choose two.)

A. HPE OneView Advanced license

B. firmware baseline

C. iLO IP address

D. Enclosure Group name

E. iLO credentials

Correct Answer: AB
