QUESTION 1

Is this something an Okta Administrator can do to manage a dashboard setting for an end user? Solution: Prevent an end user from changing the order of the applications assigned to that end user

A. Yes

B. No

Correct Answer: B

QUESTION 2

Does this Okta agent support provisioning?

Solution: Integrated Windows Authentication (IWA) Agent

A. Yes

B. No

Correct Answer: B

QUESTION 3

Is this statement true regarding the lifespan of an unused API token in Okta?

Solution: An unused API token expires after 30 days.

A. Yes

B. No

Correct Answer: A

Explanation: Token expiration and deactivationTokens expire automatically after a certain period and can also be deactivated at any time.

Token expirationTokens are valid for 30 days from creation or last use, so that the 30 day expiration automatically refreshes with each API call.

Tokens that aren't used for 30 days expire.

The 30-day period is currently fixed and can't be changed for your organization.

QUESTION 4

Is this statement true regarding the lifespan of an unused API token in Okta? Solution: An unused API token is only valid for a onetime login.

A. Yes

B. No

Correct Answer: B

Explanation: <https://developer.okta.com/docs/guides/create-an-api-token/token-expiration-deactivation/>

QUESTION 5

An employee who has left a company used an application that does NOT support lifecycle management. Is this a task generated by Okta to remind the administrator to offboard the employee?

Solution: Deprovisioning task

A. Yes

B. No

Correct Answer: A

Explanation: Employee leaves an organization As employees leave an organization, a process can be initiated by various departments to deactivate users. The user account needs to be deactivated. Deprovisioning deactivates the user account from the Okta Universal Directory. Deprovisioning ensures that persons who are no longer in your organization do not have access to sensitive applications and data. You can deprovision users in Okta or from an external user store, such as AD or a CRM app, such as Salesforce. Typically, user deactivation is triggered from an external user store and it flows into Okta. In any case, deactivated users are automatically deprovisioned from supported apps. Admins receive an email describing any apps that require them to manually deprovision from users. <https://help.okta.com/en/prod/Content/Topics/Provisioning/lcm/lcm-lifecycle-event-triggers.htm>

QUESTION 6

Is this a feature of Okta Universal Directory? Solution: Query Okta using SQL query

A. Yes

B. No

Correct Answer: B

QUESTION 7

Is this the authentication method or flow that is used when an end user launches a SAML application from the Okta end user home dashboard?

Solution: Service Provider (SP) initiated

A. Yes

B. No

Correct Answer: A

QUESTION 8

The Okta Browser plugin is NOT updating credentials. Is this a step to troubleshoot the plugin? Solution: Install the plugin under a new user profile.

A. Yes

B. No

Correct Answer: B

QUESTION 9

Is this a true statement about deleting Okta user accounts?

Solution: After an account is deleted, an administrator CANNOT reuse the deleted user name.

A. Yes

B. No

Correct Answer: B

QUESTION 10

Is this a reason to build custom authorization servers in Okta? Solution: To protect the Okta Active Directory Agents

A. Yes

B. No

Correct Answer: B

QUESTION 11

Is this an Okta setting an end user can change?

Solution: Color

A. Yes

B. No

Correct Answer: B

QUESTION 12

Is this a reason an administrator should consult the system log within Okta? Solution: to see the user password health
